EXPERIENCE

Bank of America, Charlotte, NC — *UI Developer*

April 2021 - Present

Works with the Merchant Services division. Creates and maintains several pages within the division's site using the bank's in-house framework (React Lifecycle Method). Responsibilities include:

- Working with Back End developers to create various business applications processes.
- Working with Quality Assurance to find and debug any issues discovered in testing.
- Maintaining clean, ADA compliant code.
- Attending daily stand up meetings.
- Reviewing and approving incoming pull requests from other devs.

UNC Charlotte Bootcamp, Charlotte, NC — *Student*

July 2020 - October 2020

Completed a 12 week intensive full stack bootcamp. Learned front-end and back-end technologies such as HTML5, CSS3, JavaScript, JQuery, Bootstrap, React.js, Node.js, C#, .Net, Database theory, MongoDB, MySQL, Command Line, and Git. Successfully completed multiple team projects, including a final project which featured a full functioning e-commerce site. (Please check my portfolio for some examples of my work.)

Professional Sports Publications — Charlotte, NC
Sales Manager

January 2017 - March 2020

Responsible for maintaining a team of sales representatives including training, setting expectations, and maintaining accountability. Utilized communication skills, while gaining valuable experience in team management.
